Grade:

Distinction * Distinction * Distinction *

GCSE

4 at A – C including Maths and English

Interests and Hobbies

Web Development

I have done several professional websites for friends and family.

I listened to their ideas and stylistic preferences and then built and designed a fully functioning website while maintaining communication with the client.

I have also worked in a small team to create a website, where my role was Project Manager and assistant Web Developer. During this project teamwork and time management were essential to meet the deadlines set by the client.
